SQUARE FOOTAGE

30,000 sf

DESCRIPTION

Constructed a 30,000 SF wave pool with a lagoon beach entry on one side and a zero entry on the other. The wave generator equipment was purchased from Murphy Waves out of Scotland. They also provided the installation, startup and commissioning once we had the pool up and running. Due to the size of the pool and required turnover rate we installed (8) 42" x 96" horizontal sand filters from Neptune-Benson. The filtration pumps are 40HP PACO and the chemical treatment system consists of a BECSys7 controller and Stenner liquid feed pumps for acid and chlorine.
